CAREER SUMMARY

Cybersecurity professional with enterprise experience supporting security monitoring and incident handling in large-scale environments, combined with a Master's degree in Cybersecurity from the UK. Skilled in SIEM-based threat detection, log analysis, vulnerability assessment, digital forensics, and secure application development. Strong foundation in OWASP security practices, network defense, and attack simulation, with hands-on academic experience in DFIR, cyber range labs, and secure system design.

EDUCATION

MSc in Cyber Security

Nottingham Trent University, United Kingdom | *Jan 2024-July 2025*

BE in Electronics and Communication

Anna University (KCG), India | *June 2017-Aug 2021*

WORK EXPERIENCE

Software Engineer

HCL Technologies, Chennai, India | *Dec 2021 – Aug 2023*

- Supported enterprise applications in a highly regulated financial environment, ensuring secure API integrations and adherence to secure coding practices.
- Worked with backend systems handling sensitive customer and beneficiary data, contributing to secure data processing and validation.
- Performed application-level testing and validation, identifying functional and security-related issues during development and integration phases.
- Contributed to technical documentation of APIs and system integrations, improving traceability and secure configuration understanding.
- Worked within Agile teams using Jira, following structured workflows aligned with enterprise governance and change management processes.

Cybersecurity Intern

Paramount Computer Systems, Dubai, UAE | *Nov 2025 – Dec 2025*

- Assisted with endpoint and SOC alert monitoring, investigation, and escalation activities.
- Supported endpoint security assessments and vulnerability validation using Rapid7 tools.
- Helped prepare security documentation and advisories aligned with enterprise processes.

SECURITY PROJECTS

Digital Forensics Investigation (Academic)

- Acquired forensic disk images using FTK Imager and verified integrity using MD5/SHA-256 hashing.
- Analysed evidence using Autopsy, recovered deleted files, and created forensic timelines.

Mobile & USB Forensics with Cryptocurrency Analysis

- Extracted and analysed device data using Cellebrite Physical Analyzer and ExifTool.
- Identified hidden data and steganography techniques and correlated digital evidence with cryptocurrency activity.

Cyber Range Attack–Defence Lab

- Simulated attacks using Hydra, SQLmap, XSS, hping, arpspoof in a controlled lab.
- Hardened Linux systems with firewall rules (UFW), Apache/MySQL security configurations, and deployed Snort IDS.

Secure IoT Communication Framework

- Designed a secure IoT communication setup using TLS encryption (Mosquitto) in Docker containers.
- Analysed traffic with Wireshark and simulated routing behaviour using OMNeT++.

Secure E-Commerce Web Application

- Built a web application in ASP.NET & C# with role-based authentication and secure session handling.
- Implemented controls aligned with OWASP Top 10 and validated security using OWASP ZAP.

SIEM Log Monitoring (Academic Lab)

- Created Splunk dashboards to monitor Linux logs and detect brute-force attempts and unauthorised access patterns.

SKILLS

- **SOC:** SIEM, EDR, Log Analysis, Threat Detection, IOC Identification, alert triage, security documentation
- **Security Tools:** Splunk, Wireshark, Nmap, FTK Imager, Autopsy, Cellebrite, OWASP ZAP, Burp Suite, Nessus, Snort, Docker, Nmap, Qualys
- **Digital Forensics & DFIR:** Disk Imaging, Hash Verification, Timeline Analysis, Mobile & USB Forensics
- **Web & Application Security:** OWASP Top 10, SQL Injection, XSS, Input Validation, Secure Authentication, SAST/DAST
- **Networking & Systems Security:** TCP/IP, Firewall Rules, IDS/IPS Concepts, TLS/SSL
- **Programming & Scripting:** Python, SQL, C#, Bash
- **Frameworks & Standards:** MITRE ATT&CK (foundational), ISO 27001 awareness
- **Cloud & Platforms:** AWS (Foundational Security Concepts), Linux (Kali, Ubuntu), Windows

CERTIFICATIONS

- **ISC2 Certified in Cybersecurity**
- **Certified Ethical Hacker** (Cisco)
- **Certified Junior Cybersecurity Analyst** (Cisco)
- **Fortinet Certified Fundamentals** (NSE1)
- **Cyber Threat Intelligence 101** (ArcX)
- **Rapid7 Platform Certifications** (InsightVM, InsightIDR)
